

# SRS(Software Requirement Specification)Document.

## Preface

### Course registration system V1

People have access to the system:-

- Students
- Doctors (Administrator)
- Developer
- Tester

## Introduction

The main purpose of this system is for the student to be able

to register courses.

In this system, the student can display the courses that he can

register, and he can register a course and remove a course.

The administrator can modify a course, add a course, or remove a course.

This system follows the regulations of the Faculty of Computers

and Information of Menoufia University, and therefore the student cannot register for more than 18 hours in the semester, and he cannot register a subject without succeeding in the prerequisite.

## Glossary

pre-requisite : It is a course based course, a student cannot register for the second course without succeeding in the first course (pre-requisite)

## User requirement definition
